

## Nextcloud

---

*In just a few minutes, you will have your own Cloud storage platform that is totally under your control.*

# Control your data

---

**Nextcloud** is currently recognized as an open-source alternative to platforms such as Dropbox, Google Drive, and iCloud.

**Nextcloud** lets you host your own cloud based file sharing and storage platform, whether you are an individual who just wants to store the photos from your smartphone, or a group that is looking for a way to share files.

With **Nextcloud** Simple Hosting, we want to facilitate access to this solution by providing you with a Simple Hosting instance that comes with Nextcloud already installed and ready to go. You are then free to manage it according to your needs.

[Find out more](#)

## Included with all the Nextcloud Simple Hosting plans

- ❖ You are administrator of the platform and can decide how you want to share your files. You can delegate permissions by user management tools or by a shared link for less-sensitive files.
- ❖ Our cloud is located in Europe and based on European server providers.
- ❖ Nextcloud Apps. Take advantage of the many apps that you can add to extend the possibilities given, such as shared calendars or integrated chat.
- ❖ Linked to our domain name. Having your Nextcloud platform at weopensoft, along with our domain names, the platform will be accessible in no time at all.
- ❖ Security with SSL certificate. Your Nextcloud is enabled with TLS/SSL certificate delivered by Lets Encrypt.
- ❖ Unlimited users and groups
- ❖ WebDAV
- ❖ Unlimited traffic
- ❖ Connected with Online Document Editor. Collabora supports Open Document Format (odt, pptx, xlsx)

## Terms of use
